Projects

OpenRouter Forecasting Agent

MARL Algorithm Comparison for Cooperative Communication Environment

Skills

Programming Languages

Python, Bash, JavaScript, C#, Java, C++,
C, SQL

ML Technologies

PyTorch, Keras, TensorFlow, Nvidia Triton
Server, LangChain, HuggingFace

Web Technologies

HTML/CSS, React.js, React Native,
Node.js, MongoDB

Developer Software

Git, Docker, Wireshark, Figma, WordPress,
Unity

Other Technologies

Linux, Android, IP/TCP/UDP, Real Time
Systems, Agile, Azure DevOps, CI/CD,
Cloud Providers(Azure, AWS, GCP)

Languages

English

French

Urdu

Education

Carleton University

Bachelors of Computer Science

Cybersecurity Stream

September 2021 - February 2026

Experience

Department of National Defence Canada

Ottawa, Canada

Software Developer

March 2026 - Present

- Built and configured a document augmentation pipeline using the Augraphy library for various document formats(DOCX, PDF, EML) and with OCR compatibility
- Wrote a technical research report for DRDC based on documentation for the ShadowMaker redaction tool, with detailed information on model capabilities, inference handling and diagrams

Data Science Co-op

January 2025 - August 2025

- Implemented, trained, and evaluated an optimized 40M parameter document segmentation model(DocStructNet), with 97% accuracy on the DocLayNet and PubLayNet datasets
- Reworked a Transport Canada Protected B application to replace AzureBlobService with a local version, and produced an exhaustive report on its functionality and security
- Used the AWS fmeval library, along with ECS, EC2, S3 and SageMaker to deploy a government chatbot with an evaluation pipeline
- Completed tickets in an Azure DevOps environment, interfacing with Azure GPU VMs, Azure Container Registry, and Azure SQL Database

IRM Consulting & Advisory

Remote

AI Developer

December 2023 - January 2024

- Finetuned an open source LLM from the Hugging Face model library that enabled GPU costs to be reduced by 90%
- Cleaned CIS Controls data from SCF, SOC II, CMMC and other cybersecurity frameworks
- Used LangChain and HuggingFace embeddings to build a file-based chatbot that was able to effectively interact with clients and respond to queries

Volunteering

Carleton AI Society(CAIS)

September 2024 - October 2025

Carleton University, Ottawa, Canada

- Restarted the club from zero activity, creating a new constitution, bringing on new executives, and making club accounts and a new website
- Ran 6 events over the Winter 2025 semester, explaining AI to students, with 20+ attendees
